## EXPERIENCE

### **Paraeducator, Crotched Mountain School**

Greenfield, New Hampshire / April - June 2017

I spent the Spring 2017 term working as a paraeducator at the Crotched Mountain School. I worked one-on-one with several students of various age groups and disabilities. Duties included caretaking, helping students understand and complete assignments, and helping motivate students to complete various tasks throughout the school day.

### **Counselor/Junior Counselor/Facilitator, Camp Mary Orton**

Columbus, Ohio / 2013 - 2016

I worked as a counselor for 4 summer seasons with the Adventure Academy Program at Camp Mary Orton. Adventure Academy is a program for children ages 7-14 in which the campers participate in activities in nature such as hiking as well as "adventure elements" such as climbing walls, a ropes course, and a zipline, all of which I helped facilitate.

### **Recreation Intern, Klamath National Forest**

Happy Camp Ranger District, California / March - May 2016

I worked with the Recreation department of Klamath National Forest as part of my high school's "walkabout program". Duties involved trail maintenance and development, campgrounds keeping, removal of invasive species, work on rivers and creeks, and work with livestock.

## EDUCATION

### **Antioch College**

September 2016 - Current

I am a current student in the 2020 class of Antioch College. My intended major is Environmental Science. I completed my first term with a GPA of 3.92, and my second term with a GPA of 4.0, placing me on the Dean's List for both terms. I have also served on the Community Council for one term.

### **Linworth Alternative Program and Worthington Kilbourne High School**

2012 - 2016

#### **Walkabout**

January - May 2016

The Linworth Alternative Program offers a unique program called walkabout which allows seniors to spend their second semester attaining real-world experience in an area of personal interest rather than attending classes. My walkabout was divided into three parts. The first third of my walkabout was spent working at a climbing gym and local urban farm. The second part of my walkabout was a winter backpacking trip across Yellowstone National Park. The trip required 6 months of dedicated training. The third part of my Walkabout was spent working with the Klamath National Forest's Recreation Department (see above)

## **SKILLS**

- Use of various outdoors tools
- Planting, transplanting, watering, and harvesting various vegetables
- Weeding, identification of invasive plant species
